## Notes:

- The general rate reduction and M&P deduction do not apply to: income benefiting from the small business deduction; investment income of CCPCs; and income of certain corporations (e.g., mutual fund corporations, mortgage investment corporations and investment corporations). In addition, income from a personal services business is:
  - not eligible for the general rate reduction; and
  - subject to a federal corporate tax rate of 33% (up from 28%) for taxation years ending after December 31, 2015 (pro-rated for taxation years straddling this date).
- The small business deduction applies to active business income earned in Canada of associated CCPCs, up to \$500,000. As a result of a clawback, the small business deduction is reduced if taxable capital employed in Canada, on an associated basis, exceeded \$10 million in the preceding year.

For taxation years beginning after 2018, the small business deduction for a year of a CCPC that (together with associated CCPCs) earns more than \$50,000 of passive investment income in the previous year, is reduced by \$5 for every \$1 of that investment income over \$50,000 (it is eliminated at \$150,000 of investment income). The CCPC's small business deduction will be reduced by the greater of this new reduction and the existing clawback (see above) that applies when associated taxable capital employed in Canada exceeds \$10 million.

Recent changes to the small business deduction follow:

	Changes effective after December 31, 2015		
	From	To	Effective
<b>Small business deduction</b>	17%	17.5%	January 1, 2016
	17.5%	18%	January 1, 2018
	18%	19%	January 1, 2019
